A person wearing a black t-shirt, blue jeans, and a brown belt is standing in a field of tall, dry grass. They are holding a silver, cylindrical pump with a red band and a white label. The pump is connected to a thin, light-colored hose that runs down the person's leg. The background is a soft-focus field of golden-brown grass under a clear sky.

You've got water to move, and at

We know the right pump is only

downtime is a dirty word. And

about how to make every pumping

A person wearing a brown t-shirt and dark pants is walking away from the camera through a field of tall, dry, golden-brown grass. The background is slightly blurred, showing more of the field and some green foliage in the distance. The overall lighting is warm, suggesting a sunny day.

PumpsOK, we're old pros at that.

half the battle. We believe that

since 1968, we've learned a lot

system work just as hard as you do.

A PUMP IS A START.

Pumps are a given, and we stock more than anyone. And more than anyone, we also have a willingness to lean into and rally around whatever field challenge you face, and never tell you it can't be done. Because at PumpsOK, we believe the solution is always there—and we won't stop until we find it.

A close-up photograph of a man with short brown hair, wearing a dark t-shirt, looking down intently at a bundle of colorful wires (red, green, yellow, blue) he is working with. The background is blurred, suggesting a workshop or industrial setting. A semi-transparent grey box with rounded corners is overlaid on the lower left of the image, containing text.

KNOWLEDGE RUNS DEEP.

Any wholesaler knows the price of a pump and how long it takes to ship. At PumpsOK, we also take the time to understand the work you have to accomplish and the road blocks you're fighting, and we'll use every ounce of our know-how and experience to help you get the job done.

FIELD READY PUMPS

You know who to call for a pump. But who do you call for 50-foot motor leads you don't have to splice yourself? Or seals that'll stand up to all the

stuff you have to pump? At PumpsOK, we've made a name by making a pump do things no one else can, so when it ships, it goes to work for you right out of the box.

YOU'VE GOT PLENTY OF HEADACHES.

Your pump shouldn't be one of them. We don't claim to control the weather, or to keep your phone from ringing at night.

But we can ship you the right pump the first time, and outfit it so it works hard and it lasts. In other words, when you call us, we're on it. And you can check at least one headache off your list.

ONLY THE LOCALS KNOW THE BACK ROADS.

We grew up in Oklahoma, and around here, a lot of pumps pump a lot of stuff. Over the years we've had the opportunity see a lot and to solve a lot, and today, we can put all of that knowledge to work for you. So no matter where you are, PumpsOK is right down the street and ready to help.

AND THEN SOME.

We're not a big box wholesaler, and we don't sit in glass offices.

Our feet are on the ground, just like yours. We do business the way

you do business, and we treat

you like a friend. So if you

have a problem after hours, we

can help. If you need a part at

6:00 in the morning, we'll be

there. And then some.

WATER WELL

Submersible pumps from 5 to 1,400 gpm, as well as the casing, wire, drop pipe, poly pipe, fittings, well seals, adapters, and controls you need to get the job done.

CENTRIFUGAL AND BOOSTER

Centrifugal, split case, or booster pumps for applications as small as single-home systems or as large as 6,500 gpm. Options include cast iron, bronze fitted, or stainless steel for pressure boosting pumps, salt water transfer, system water supply or boiler feeder pumps, vertical multistage centrifugals, and more.

SUMP, SEWAGE, AND SLURRY PUMPS

From a 5-gpm sump pump application to moving 1000+ gpm of a corrosive or abrasive slurry with a mix of solids, we'll not only recommend the best pump for your job, but also design and fabricate entire systems, including prefabricated lift stations or duplex systems with custom controls.

ENVIRONMENTAL SYSTEMS

Chemical resistant pumps and motors, and continuous lead cables that meet water regulatory requirements for 2 gpm water sampling projects up to 1400 gpm remediation sites. Our in-house manufacturing services can custom fit any pump or motor with Teflon and Viton seals to stand up to these tough applications.

SOLAR POWERED PUMP SYSTEMS

If electrical power isn't available, we can custom-design a complete solar system including pumps, controls, solar panels, cable, discharge pipe, and more.

OIL & GAS

We offer 304 stainless steel pumps and motors specially made for rugged field applications up to 1600 feet total dynamic head and 1,100 barrels per day.

CONTROLS AND DRIVES

Indoor, outdoor, and even explosion-proof controls for simplex or multiplex applications, including variable frequency drives. We can also pre-package control systems for your unique application.

FLOWMETERS

Electromagnetic, turbine, and mechanical flowmeters for a broad range of industrial, irrigation, and chemical injection applications. Sizing up to 10" diameter inline meters with multiple options for read-out data translation.

CUSTOM MANUFACTURING

Our 8,000 square-foot manufacturing facility is staffed with engineers and technicians who have the knowledge and expertise to design and fabricate a custom system for your site-specific considerations.

*Custom length continuous motor leads
Certified oil field splices
Custom Control Panel Design
Flow sleeve and wheeled shrouds
Skid-mounted pump systems
Prepackaged remediation systems*

PUMPSOK IS AN AUTHORIZED DISTRIBUTOR OF THESE QUALITY BRANDS*:

*Grundfos
Goulds Water Technologies
Franklin Electric
BJM Pumps
Little Giant
Liberty Pumps
316 Stainless Pumps
Jet Eductor Systems
Yaskawa VFD's
Aquavar CPC
Coyote Systems
Siemens Panels
Seametrics
Turbines Inc.
Cornell
Simmons*
